

Virology Proficiency Test program

Survey Requirements

This module is designed for Laboratories and areas that routinely perform HIV, HBsAg, HCV and TPHA testing including rapid HIV testing.

Sample specifications

There are 4 surveys per year consisting of 6 serum samples.

Selection Criteria

Samples include Virology reactive and non-reactive samples.

In addition, customer satisfaction questionnaires are distributed annually to provide the SANBS Proficiency Test program with participant feedback regarding the Proficiency programs.

Reports and Assessment

The HIV Proficiency targets and acceptable responses are pre-determined based on original data from the instrument and results reported for the donation on the IT system.
